Continuation of 2. NOTE: As per applicant's arguments regarding Takaya's method would be impossible to retrieve information on multiple facilities that fulfill sought information at the same time have been considered but are not persuasive. Takaya's system provides search templates, and allows a location name search, a type of industry search, a free keyword search, etc. These types of search will return multiple facilities in the specified location or industry.

In response to the applicant's challenge to provide evidence that the registration template including essential items that must be inputted when facility information is registered, and supplemental information that relates to other items is not required to be inputted, the examine provides US patent to Sutcliffe et al. (US 6,052,122) and www.match.com as evidence. Sutcliffe teaches registration template including essential items that must be inputted when facility information is registered (Sutcliffe, col. 6, lines 10-17, and www.match.com), and supplemental information that relates to other items is not required to be inputted (Sutcliffe, col. 7, lines 34-37, and www.match.com). The search is based on non-omitted sought information (Sutcliffe, col. 6, lines 11-20).
